

AI Chatbot Guide

Operational SOP Assistant & Natural Language Data Queries

One Janitorial Operations Library

Version: v4.0.0
Release Date: June 23, 2026
Author: Antigravity Automated AI

Table of Contents

- 1. Overview & Purpose
- 2. Key Features & Blueprint
- 3. System Process Flow (Vector Diagram)
- 4. Step-by-Step Usage & Operations
- 5. Best Practices & Safety Guidelines
- 6. Troubleshooting & FAQ
- 7. Glossary & Appendix

1. Overview & Purpose

Guide to operating and maintaining the SOP assistant chatbot, including review of customer satisfaction metrics.

Allows managers to audit conversations, review client ratings, and refine system knowledge bases.

Explains conversational AI query structures inside the Analytics Assistant.

2. Key Features & Blueprint

SOP Semantic Query Box: User-facing chatbot addressing operational questions using stored manuals.

AI Analytics Assistant: Conversational tab allowing operators to ask direct questions about data.

Correction Engine: Panel showing low ratings, letting admins map queries to updated documents.

3. System Process Flow

4. Step-by-Step Usage & Operations

Interacting with the Chatbot: Open chat module, type question, read response, and provide rating.

Running AI Queries: Go to Analytics -> AI Assistant, input operational queries, and view chart recommendations.

Training Chatbot: Access Chatbot settings, check feedback list, select query, and map to correct SOP.

5. Best Practices & Safety Guidelines

- Check feedback lists daily to address low ratings immediately.
- Review AI suggested charts before adding them to permanent dashboards.
- Ensure that uploaded manuals are kept up-to-date with current procedures.

6. Troubleshooting & FAQ

Chatbot unresponsiveness: Confirm backend service is running and check vector store database connectivity.

AI Assistant gives generic replies: Provide specific dataset IDs and clarify column names in the prompt.

Inaccurate search results: Verify that target SOP documents are loaded and indexed in the RAG library.

7. Glossary & Appendix

Feedback Loop: Process of improving chatbot response quality based on user reviews.

Semantic Lookup: Contextual search mechanism.

Conversational Query: Natural language prompt requesting numerical statistics.
