- 3. System Process Flow (Vector Diagram)
- 4. Step-by-Step Usage & Operations
- 5. Best Practices & Safety Guidelines
- 6. Troubleshooting & FAQ
- 7. Glossary & Appendix

1. Overview & Purpose

Operations guide for resolving customer tickets, managing SLAs, and reviewing customer feedback.

Ensures service complaints are resolved quickly by using auto-escalation pathways.

Provides customer service analytics for ticket resolution SLA audits.

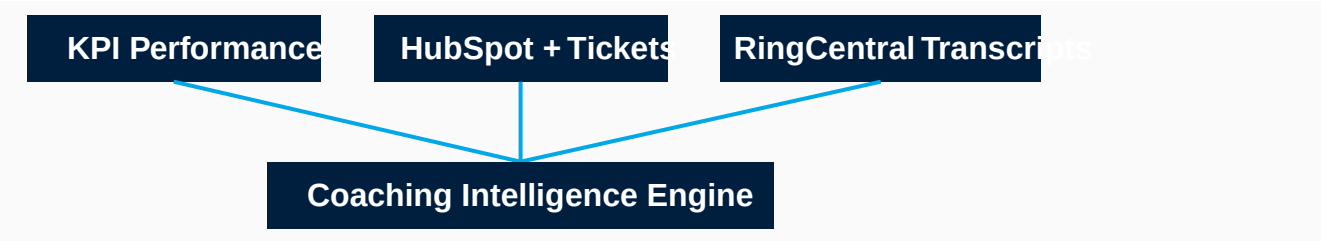

2. Key Features & Blueprint

SLA Priority Matrix: Dynamic resolution timers based on ticket severity (Urgent, High, Medium, Low).

Negative Rating Auto-Escalation: Trigger that creates escalations if a client issues a thumbs-down score to the chatbot.

CSAT Metrics Widget: Visualization rendering average customer feedback scores.

3. System Process Flow

4. Step-by-Step Usage & Operations

Claiming an SLA Ticket: Navigate to support panel, sort tickets by deadline, select item, and read issue.

Viewing Customer Feedback: Open Chatbot Feedback panel to inspect negative reviews and linked transcripts.

Analyzing Ticket Backlog: Navigate to Analytics -> CS Dashboard, audit resolution averages, and identify bottleneck regions.

5. Best Practices & Safety Guidelines

- Handle urgent complaints within 4 hours to avoid automatic escalation warnings.
- Attach relevant SOP references to ticket logs to build knowledge history.
- Regularly review ticket category distributions in analytics to optimize staff allocation.

6. Troubleshooting & FAQ

- SLA timers missing: Verify ticket creation date structures and confirm priority is set.
- Feedback logs blank: Confirm that chatbot ratings are synchronizing and check collection logs.
- Escalation emails not firing: Check status of email sender node configuration settings.

7. Glossary & Appendix

SLA: Service Level Agreement - Target timelines for resolving issues.

Escalation: Route tickets to managers when SLA limits approach.

CSAT: Customer Satisfaction Score.
