

# Developer Handbook

Extending the Platform, Dashboard Widget Creation, and Coding Standards

## One Janitorial Operations Library

Version: v4.0.0

Release Date: June 23, 2026

Author: Antigravity Automated AI

### Table of Contents

1. Overview & Purpose
2. Key Features & Blueprint
3. System Process Flow (Vector Diagram)
4. Step-by-Step Usage & Operations
5. Best Practices & Safety Guidelines
6. Troubleshooting & FAQ
7. Glossary & Appendix

### 1. Overview & Purpose

Reference guide for developers building new custom nodes and extending platform workflows.

Contains coding rules, file layouts, and template guides to ensure clean extensions.

Provides guides on coding custom statistics models and visual dashboard widgets.

### 2. Key Features & Blueprint

Extensible Node Factory: Registry interface for developing and adding custom nodes.

Widget Catalog Extension: Instructions to code and register new dashboard chart components.

Coding Style Standards: Rules for variable names, folder structures, and styles.

### 3. System Process Flow

### 4. Step-by-Step Usage & Operations

Implementing Custom Node: Write node definitions, create UI parameters file, and index in factory files.

Adding Custom Dashboard Charts: Edit `Analytics.jsx` widgets switch, add layout templates, and map data parameters.

Creating Pull Request: Submit code changes, run automated lint tests, and request review.

### 5. Best Practices & Safety Guidelines

- Strictly follow existing code structure and variable naming conventions.
- Write detailed unit tests for all custom logical workflows.
- Always use theme configuration palette tokens for custom colors.

### 6. Troubleshooting & FAQ

Linters test failures: Run linter tool locally to locate and resolve syntax violations.

Widget rendering blank: Check if the dataset fields map correctly to chart labels.

Import mapping errors: Verify relative path configurations in target files.

7. Glossary & Appendix

- Linters: Tool that checks code for syntax rules.
- Pull Request: Submission of code updates for audit.
- Widget Config: Object schema containing dashboard visual fields.
