1. Overview & Purpose

User manual for processing applicants, ranking resumes, and maintaining worker files.

Leverages AI screening to automate candidate reviews, ranking applicants on qualifications.

Integrates HR dashboards to monitor recruitment volume, pass rates, and training performance averages.

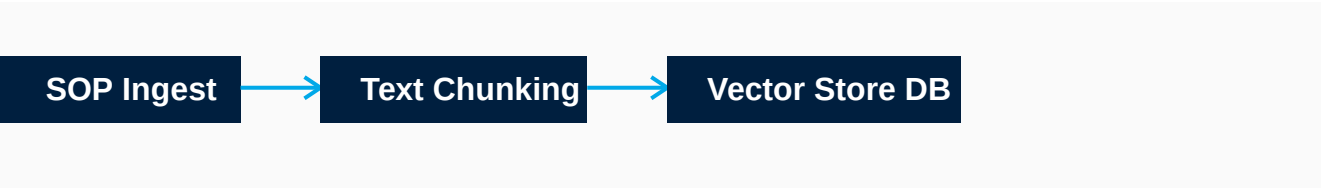

2. Key Features & Blueprint

Drag-and-Drop Resume Ingest: Tool for uploading candidate documents to trigger screening workflows.

Applicant Scorecard: Matrix containing AI-calculated criteria grades, overall rankings, and summaries.

HR Analytics Dashboard: Analytics view rendering hire rates, employee distribution, and training scores.

3. System Process Flow

4. Step-by-Step Usage & Operations

Uploading Candidate Files: Navigate to HR panel, drag resume PDFs to ingest box, and click parse.

Hiring Candidate: Click Hire on high-scoring card. System automatically creates an employee record.

Auditing Employee Performance: Navigate to Analytics -> HR Dashboard, and inspect scorecards averages.

5. Best Practices & Safety Guidelines

- Review AI summary scores manually before making final interview decisions.
- Clean applicant databases monthly to comply with records storage standards.
- Validate training records status weekly to maintain up-to-date performance logs.

6. Troubleshooting & FAQ

- File parse failures: Ensure file extension is supported and check file content for corruption.
- Scores missing in directory: Confirm that employee training logs are registered under their active ID.

Missing resume text: Run scanned documents through OCR nodes to convert images to readable text.

7. Glossary & Appendix

AI Screening: Automated summary and grade calculation.

Employee Profile: A database log representing active staff records.

Training Scorecard: Metric measuring staff compliance exams.
